

## Health and Safety Data

Product	Supreme Green		
Biological Contents:	Contains a mixture of grass seed and mycorrhizal fungi. Mycorrhizal Fungi are Class 1 (COSHH) organisms that are naturally occurring soil bacteria and fungal spores and are harmless to humans. Other contents are below all threshold levels as indicated in the Chemicals (Hazard information and Packaging for Supply) Regulations 1997, and contents listed in the Approved Supply List 1998 published by the Health and Safety Commission.		
	Seed is not considered to be a substance or a preparation as stated by the Health & Safety Executive. However as dust is present in grass seed, being common knowledge, it is suggested that due diligence is paid to the safety surrounding the grass seed environment.		
Reactivity:	Chemically stable		
Boiling Point:	N/A	Flash Point	N/A
Flammable:	No		
Carcinogenic:	No		
Mutagenic:	No		
Toxic to reproduction:	No		
Danger to the environment	No		
Fire Risk	Not a fire risk when stored under recommended conditions		
Usage notes:	Avoid creating excessive dusts, especially in enclosed environments		
Storage:	Avoid creating excessive dust. Store in containers supplied.		
In event of spillage:	Avoid creating excess dust. Wet down spilled material lightly. Sweep up excess material and use the product as intended		
Waste Disposal:	Sweep up excess and apply to turf, trees or plants as intended		
	Recommended Safety Precautions
